Test Plan Name	**AV-TEST Windows Business 2025 Test Series – Incremental Compliance Report for July and August 2025 Tests [AMTSO-LS1-TP147]**
Compliance Assessors	Scott Jeffreys
Compliance Assessment Date	October 17th, 2025
Report Summary and Commentary	1. Seventeen (17) test subject vendor's products from sixteen (16) unique vendors were tested as part of this Test Report covering Windows 11 Business Users. 2. Two (2) Phase 2 Commentary forms were received (GenAvast, Broadcom). While GenAvast reported no concerns, Broadcom raised a point of contention on sample selection. Specifically, the details follow. "Regarding the Usability portion of the test as was stated in the Broadcom Phase 1 commentary, Broadcom's position is that FP (false positive) tests for enterprise security software should only include samples that are relevant in an enterprise space. We believe samples with no or extremely low prevalence should not be included, because a security product blocking these during a test would have no real-world effect. In the "False Positive Dynamic" test, our product blocked a sample that we have never seen in our telemetry. As stated during the dispute phase, we believe this sample should have been removed from the test due to its lack of relevance in the enterprise space." 3. This commentary has been shared with the tester who is reported to be in contact with the vendor for discussions and clarifications. 4. **This incremental Test Series check is confirmed compliant with AMTSO Standard V1.3.**
